3rd Annual ERAS Symposium
Making Surgery Better

The Enhanced Recovery After Surgery (ERAS) program offers an opportunity for collaboration with leading experts in the field of ERAS with a goal to hasten functional recovery and improve postoperative outcomes. Successful implementation of an ERAS program requires a multidisciplinary team effort and active participation of the patient in the recovery program.

Discussion Topics Include:
• Why ERAS protocols are important
• Key criteria to examine when initiating ERAS protocols
• Critical aspects of successful ERAS protocols
• Creating a solid follow-up process
